

"Air On The Go"

Powder coated "safety yellow" for visibility and a tough, long-lasting finish

Compact multi-speed touch pad with LED display offers easy, weather resistant operation

OSHA compliant slim-line cage exceeds safety standards

High performance gear motor is precision machined then case hardened for extended service life

Compact right angle drive and precision machined, pre-balanced hub is designed for low noise

Heavy-duty swivel casters with individual brakes and swivel locks for durability and mobility in the toughest of environments

Equipped 115V 20A power cord and plug assembly allows for quick and easy operation

Rugged, quick-lock handles on each end of the frame permit a full 360° of angle adjustments

Fan and cage ship completely assembled to immediately satisfy mobile cooling requirements (just add casters)

A high volume/low speed (HVLS) technology delivers energy efficient air movement as a vertical package

Technical Specifications

Dimension (W x H x D)	96" x 101" x 30"
Free air displacement @ 180 RPM	45,496 CFM
Motor Size	1 HP
Voltage	115 V
Power consumption @ 180 RPM	12 Amps
Noise @ 180 RPM	69.5 dBA
Weight	450 lbs
